1 [Pen computing: a technology overview and a vision](#)

André Meyer

 July 1995 **ACM SIGCHI Bulletin**, Volume 27 Issue 3

Full text available: pdf(5.14 MB)

 Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

This work gives an overview of a new technology that is attracting growing interest in public as well as in the computer industry itself. The visible difference from other technologies is in the use of a pen or pencil as the primary means of interaction between a user and a machine, picking up the familiar pen and paper interface metaphor. From this follows a set of consequences that will be analyzed and put into context with other emerging technologies and visions. Starting with a short historic ...

2 [A framework for the assessment of operating systems for small computers](#)

Hossein Saiedian, Munib Siddiqi

 April 1996 **ACM SIGICE Bulletin**, Volume 21 Issue 4

Full text available: pdf(1.89 MB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

A number of high performance operating systems are now available for small computers on different hardware platforms. These operating systems offer many advanced features formerly reserved for their workstation and minicomputer counterparts. This article surveys the most widely used of such operating systems, namely OS/2, Windows NT, Linux and Macintosh System 7.5. It provides an account on the history, design objectives and evolution of these operating systems and discusses their key features, ...

Keywords: CP/M, DOS, Linux, Macintosh, Microcomputers, OS/2, Operating Systems, Small Computer Systems, Windows, Windows NT

3 [Posters: A wireless handheld multi-modal digital video library client system](#)

Michael R. Lyu, Jerome Yen, Edward Yau, Sam Sze

 November 2003 **Proceedings of the 5th ACM SIGMM international workshop on Multimedia information retrieval**

Full text available: pdf(814.79 KB)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We developed technologies for transmitting video contents over wireless platforms, and encapsulated these video delivery and presentation technologies into a client system for accessing a multi-modal digital video library. The mobile access system, *iVIEW client*, provides a user interface that meets the challenge of rich multi-modal information presentation on wireless hand-held devices. An XML schema is employed to organize the multi-modal metadata for better data interoperability. Further ...

Keywords: XML, browser and interface on mobile devices, mobile applications, multi-modal

content retrieval, multimedia information retrieval, multimedia management and support

4 Wireless LAN security and laboratory designs

Yasir Zahur, T. Andrew Yang

January 2004 **Journal of Computing Sciences in Colleges**, Volume 19 Issue 3

Full text available:  [pdf\(181.24 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

For the past couple of years, increasing number of wireless local area networks (WLANs), based on the IEEE 802.11 protocols, have been deployed in various types of locations, including homes, schools, airports, business offices, government buildings, military facilities, coffee shops, book stores, as well as many other venues. One of the primary advantages offered by WLAN is its ability to provide untethered connectivity to portable devices, such as wireless laptops and PDAs. In some remote comm ...

5 Embedded Systems News

Rick Lehrbaum

September 2000 **Linux Journal**

Full text available:  [html\(11.75 KB\)](#) Additional Information: [full citation](#), [index terms](#)

6 Designing computers with people in mind

Anne Garrison, S. Joy Mountford, Greg Thomas

April 1994 **interactions**, Volume 1 Issue 2

Full text available:  [pdf\(935.78 KB\)](#) Additional Information: [full citation](#), [index terms](#), [review](#)

7 Net.Speech: desktop audio comes to the net

Larry Press

October 1995 **Communications of the ACM**, Volume 38 Issue 10

Full text available:  [pdf\(310.85 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In the 1940s, the first research computers worked on numeric data. A few years later, the UNIVAC, was designed for both numeric and alphanumeric data. Over time, technology advances have made other data types economically feasible—text, images, sound, and video.

8 Faculty training initiative at the indiana university school of education: a participative effort

Carol Rhodes, William Goveia

November 2002 **Proceedings of the 30th annual ACM SIGUCCS conference on User services**

Full text available:  [pdf\(467.79 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Studies show that for university faculty members, the effort to keep pace with new technology has created a significant rise in stress, and this technology-induced strain can contribute to increased exhaustion and reduced workplace satisfaction. Studies also show that professors are more satisfied with technology if they have received training. In addition, professors are more likely to accept technology training if provided with an incentive. During the fall semester of 2001, the Dean of the Ind ...
